Visoka škola strukovnih studija za informacione i komunikacione tehnologije u Beogradu

Visoka ICT škola

Web programiranje 1 – dokumentacija za sajt

Ime I prezime studenta: Mišo Černak

Broj indeksa: 274/19

Februar 2020, Beograd

Sadrzaj:

1.Uvod

Sajt za predmet Web programiranje 1, napravljen je po uzoru na web sajt [YTS.LT](YTS.LT), cija je tema besplatno preuzimanje filmova visokog kvaliteta.
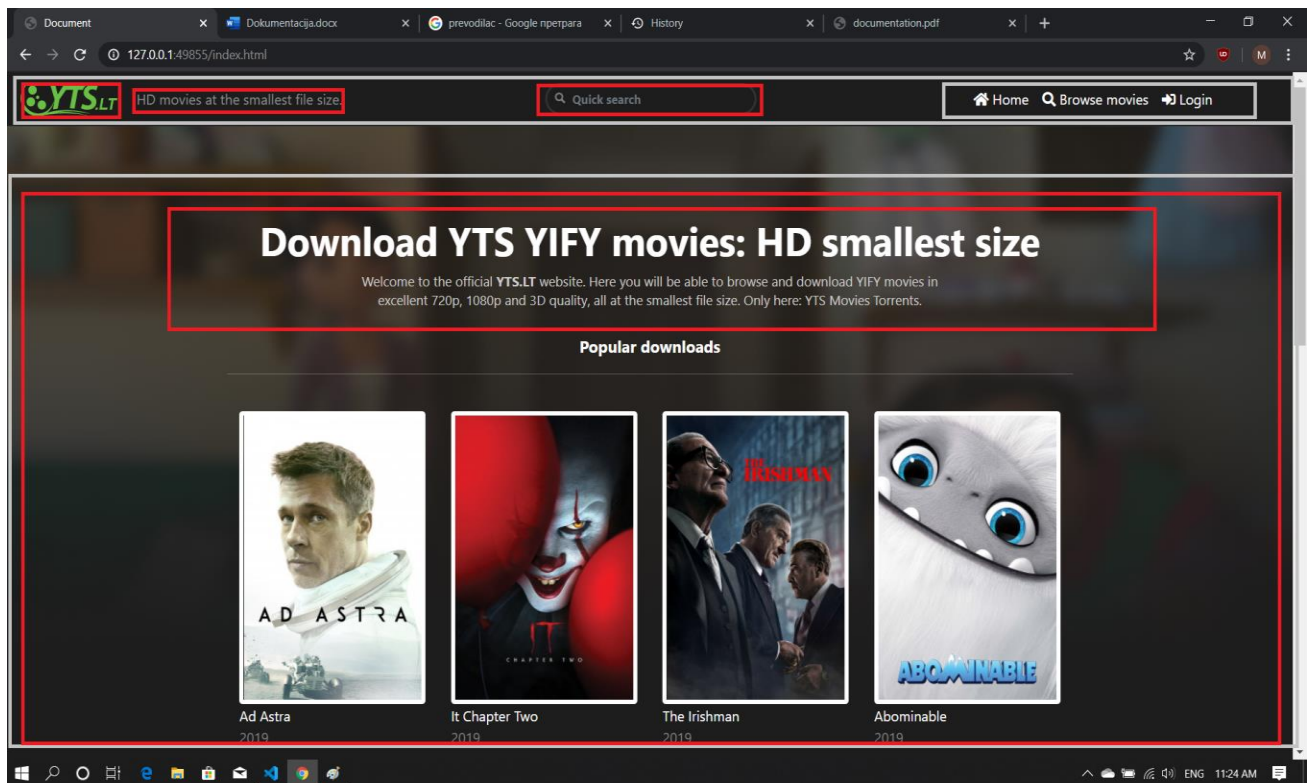

1.1 Korisceni programski I markup jezici

Za izradu sajta korisceni su: HTML 5, CSS 3, Bootstrap 4, jQuery, JavaScript

Bootstrap 4 je koriscen kad framework koji bi trebalo da olaksa prilagodljivost sajta svim uredjajima, ali I pored toga prisutno je oko 600 linija CSS 3 koda koji omogucava zeljeno ponasanje stranice na mobilnim uredjajima.

Pored navedenih tehnologija, korisceni su I google fonts, kao I font awesome, a ceo sajt je pisan u Visual studio code editoru.

1.3 Template

Index.html

HTML kod za sve stranice je pisan po uzoru na YTS.LT sajt, u bootstrap framework-u, ali su neke komponente dodate a neke oduzete. Kod je pisan samostalno, uz pomoc bootstrap dokumentacije - https://getbootstrap.com/docs/4.1/getting-started/introduction/ .

1.4 Korisceni CSS

CSS kod je napisan samostalno, ali neke funkcije kao sto su npr. Zatamnjenje fotografije kada se predje kursorom preko banera filma, ne funkcionisu trenutno na Mozila Firefox I IE. CSS je pisan tako da bude mobile first, odnosno pravila koja su pisana u @media override-uju pravila iznad njih, ali se odnose samo na uredjaje sirine preko 992px.

## 2.3 Opis funkcionalnosti

Index.html

Index.html je jedina stranica na sajtu ciji se sadrzaj ispisuje dinamicki pri ucitavanju same stranice. Na "DOMContentLoaded" event se poziva funkcija koja u vec napravljene content-holdere na stranici dinamicki upisuje podatke koje cita iz niza koji je inicijalizovan u app.js fajlu I sluzi kao prosta baza podataka.

Ukucavanjem odredjenog pojma u "Quick search" formu u headeru stranice, moze se pronaci bilo koji film, odnosno mogu se pretraziti svi filmovi koje sadrzi niz. Na "keyup" event se poziva funkcija koja pretrazuje filmove iz niza po zadatom pojmu, a upisuje ih kao list item-e u formu koja se nalazi u div elementu. Fokus na polje za brzu pretragu filmova poziva funkciju koja odredjuje poziciju samog polja, I na osnovu te pozicije pozicionira div element koji sadrzi listu u koju ce se upisivati filmovi koji su rezultati pretrage, sto omogucava da rezultati uvek budu ispod polja za pretragu, iako se sirina browsera smanji.

Na mobilnoj verziji sajta, polje za brzu pretragu, kao I slogan, dobijaju vrednost display:none; , a navigacioni meni sastavljen od 3 linka iskombinovana sa font-awesome ikonicama postaje sakriven, I vidljiv jedino kliktanjem na ikonicu koja oznacava meni. U jquery.js fajlu, ispisan je kod koji funkcijom .toggle("slow") prikazuje, odnosno sakriva navigacioni meni.

*Header I footer, kao I funkcionalnosti u header-u su istina svim stranicama, osim na stranici about-author.html.

browse-movies.html
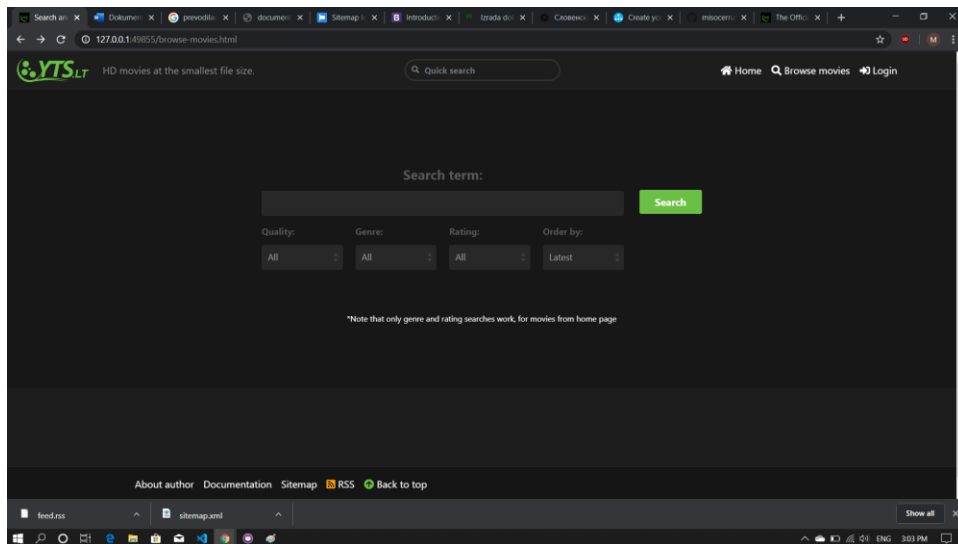

Stranica browse-movies.html sadrzi formu koja se sastoji od input polja za upis karaktera za pretragu I cetiri select polja koja sluze za odabir kriterijuma po kojima ce se vrsiti pretraga filmova. Pretraga filmova funkcionise samo po Genre I Rating kriterijumima, I funkcija koja vrsi pretragu filmova pisana je u app.js fajlu. Klikom na Search dugme koje se nalazi pored polja za unos karaktera za pretragu, dinamicki se na osnovu odabranih kriterijuma, u vec unapred odredjene holdere, ispisuju filmovi koji ispunjavaju zadate kriterijume.

Primer: Genre: Drama, Rating: 7+ - ispisuje samo "Spare room" I "Little children".

login-register.html
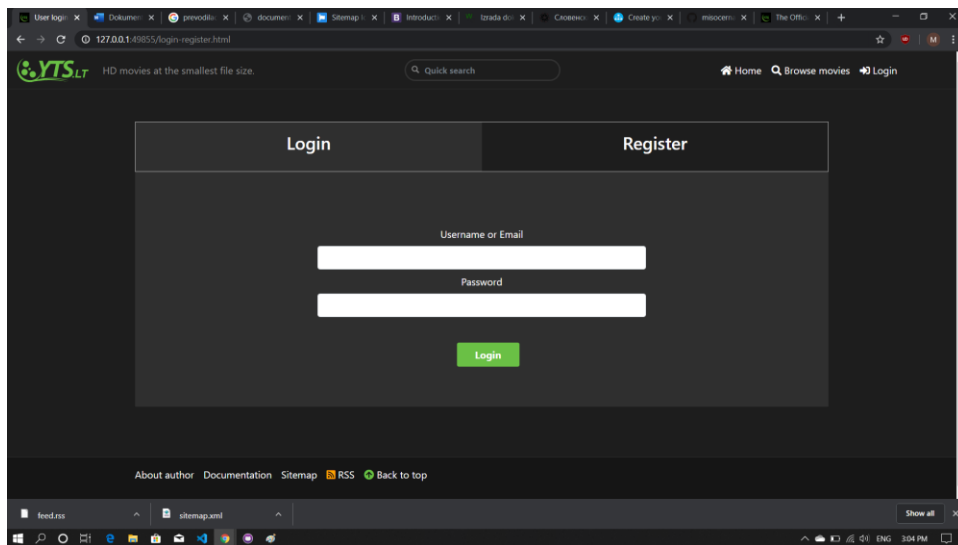

Na ovoj stranici se nalaze dve forme, od kojih jedna sluzi za logovanje korisnika I prikazuje se prilikom load-ovanja stranice, a druga sluzi za registraciju korisnika I prikazuje se klikom na polje "Register" tako sto joj se menja vrednost display: none. Aktivna forma, kao I svrha forme, obelezeni su drugom pozadinskom bojom.
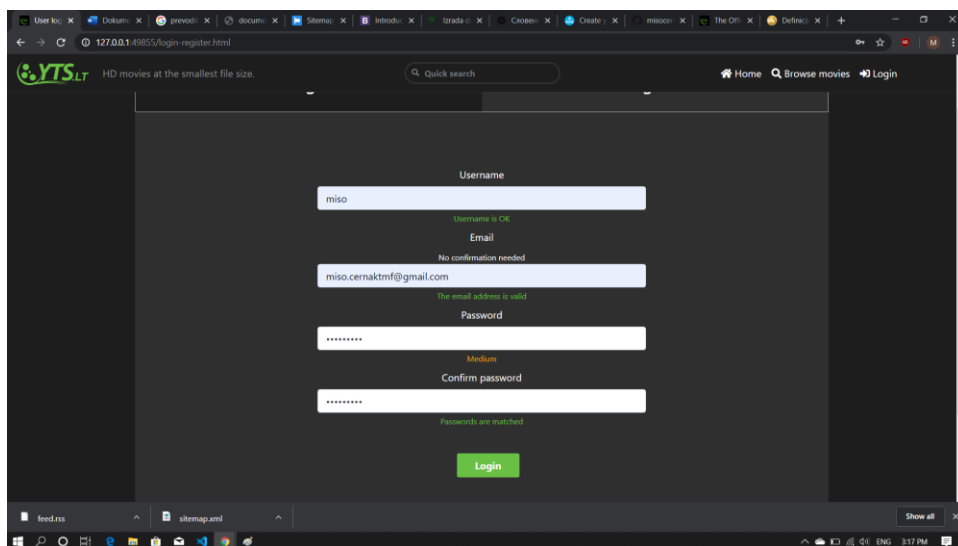

Polja register forme imaju funkciju validacije. Same funkcije koje vrse validaciju polja ove forme se aktiviraju na blur() event, I pisane su u jquery.js fajlu, dok polja forme za logovanje korisnika nemaju nikakvu validaciju, jer bi validacija te forme trebalo da se radi na back-end-u.

Zavisno od toga sta funkcije koje vrse validaciju vrate kao rezultat validacije (true/false), prikazuje se unapred odredjeni tekst koji krajnjem korisniku daje do znanja da li je sve okej sa unetim podacima,

ili da li uneti podaci ne ispunjavaju potrebne kriterijume koji su postavljeni regular expression-ima.

Svako polje forme ima svoje unapred odredjene tekstove, tako da se za svako polje ispisuje tekst koji se odnosi samo na to polje.

Ispisivanje teksta je omoguceno preko jQuery funkcija hide(), odnosno show().

Sve stranice imaju staticki ispisan footer, koji u sebi sadrzi unordered list sa pet list-item-a. Poslednji list-item reaguje na click() event, I scroll-uje stranicu do vrha (odnosno do top: 0), uz odredjenu animaciju.

            <p>

                Ćao. <br> Zovem se Mišo Černak, i student sam visoke ICT škole.
Pre visoke ICT, studirao sam biohemiju

                na Tehnološko-metalurškom fakultetu. Za Web programiranje sam se
opredelio nakom uspešno završenog IT

                Bootcamp-a, koji je organizovala Divac fondacija. Tada sam
shvatio da je Web programiranje ono čime

                želim da se bavim. Iza sebe već imam nekoliko projekata. Sa svoje
22 godine, veoma sam ambiciozan i

                željan znanja iz oblasti kojom želim da se bavim, tako da i pored
gradiva iz škole, kod kuće sam učim

                stvari koje mislim da će mi biti potrebne, kao što su Python,
Flask, Django, Git, Vue.js, Node, ali i

                neke aplikacije koje nisu usko vezane za Web programiranje, kao
što su Photoshop, Illustrator,

                SonyVegas, Adobe After Effects, Audacity. Trenutno radim za
kompaniju Huawei, i nadam se da ću u njoj

                uspeti da izgradim veliku karijeru kao budući web developer.

            </p>
